GOVERNMENT STATISTICIAN OF NEW SOUTH WALES

TRADE, TRANSPORT, AND COMMUNICATION

PREFACE

This issue of the *Trade, Transport, and Communication* Part of the *Statistical Register for New South Wales* contains statistics for 1961-62, 1962-63, and earlier years.

The statistics given in this publication should be read in conjunction with the *Official Year Book of New South Wales*. For the latest figures in the principal statistical series, the reader should refer to other publications of the Bureau, particularly the *Statistical Bulletin* and the *Monthly Summary of Business Statistics*.

My thanks are tendered to the responsible officers of the various State and Commonwealth Departments and to others who have supplied information, often at considerable trouble.

K. Davison
Deputy Commonwealth Statistician

EXPLANATORY NOTES

Overseas Trade Statistics

1. Statistics of overseas trade are compiled from copies of customs warrants (or entries) lodged by importers and exporters (or their agents) with the Department of Customs and Excise.
2. The overseas trade statistics for New South Wales relate to the imports into and exports from Australia passing through the customs at N.S.W. ports. The imports do not provide a record of the overseas goods used or consumed in New South Wales, as some of the goods pass subsequently to other Australian States and some goods imported through other States pass into New South Wales. The exports include products of other States shipped overseas from N.S.W. ports, but exclude products of New South Wales shipped overseas from ports in other States.
3. *Valuation of Overseas Imports and Exports*
 - (a) The values shown for goods *imported* are the values on which customs duty was payable, or would have been payable if the duty was charged *ad valorem*. In assessing goods for *ad valorem* duty, their value is taken to be the actual price paid by the Australian importer plus any special deduction, or the current domestic value in the country of export, whichever is the higher, together with all charges for placing the goods free on board at the port of export. Import values are therefore shown on an f.o.b., port of shipment, basis and are expressed in Australian currency.
 - (b) The values shown for goods *exported* are also on an f.o.b., port of shipment, basis, expressed in Australian currency. In general, they have been assessed as follows:—
 - i. Goods sold to overseas buyers before export—the f.o.b. equivalent of the price at which the goods were sold; for example, for wool, the actual price paid by the overseas buyer plus the cost of all services incurred by him in placing the wool on board ship.
 - ii. Goods shipped on consignment—the Australian f.o.b. equivalent of the current price offering for similar goods in the principal markets of the country to which the goods were despatched for sale; for wool, the f.o.b. equivalent of the current price ruling in Australia normally provides a sufficient approximation of the f.o.b. equivalent of the price ultimately received.
4. (a) *Outside packages* (containers, crates, etc.) are treated as a separate item in the classification of imports. For exports, however, the value recorded for each item includes the value of outside packages.
(b) Throughout this publication, the value of *Parts* of articles is included with the value of the complete units, unless otherwise stated.
5. *Stores* (including bunker coal and oil) taken on board ships and aircraft departing from New South Wales for overseas countries are excluded from the figures of overseas exports. (Details of ships' and aircraft stores exported in recent years are given on page 32.)
6. The statistics of overseas trade include imports and exports on government account (which are treated as normal transactions) and those "passengers' personal effects" for which customs entries are required.
7. In 1956-57 and later years, goods are shown as exported "*For Orders*" where the country of destination was not determined at the time of export. In earlier years, goods exported "*For Orders*" were allocated arbitrarily to countries on route of shipment.
8. (a) Figures shown in this publication for *E.E.C. Countries* and *E.F.T.A. Countries* represent the trade in the years shown with the countries which are now members of, or associated with, the European Economic Community and the European Free Trade Association, respectively. The *E.E.C. Countries* are Belgium-Luxembourg, France, Federal Republic of Germany, Greece, Italy, Netherlands, and their dependencies; the figures for *E.F.T.A. Countries* include Denmark, Finland, Norway, Sweden, Austria, Portugal, Switzerland, and their dependencies, but exclude the United Kingdom.
(b) The *Soviet Area*, as used in this publication, comprises for all years shown: Albania, Bulgaria, the Republic of China (Mainland), Czechoslovakia, Eastern Germany, Hungary, North Korea, Poland, Romania, U.S.S.R., and North Vietnam.
(c) Figures shown for trade with the *United States of America* include, for all years shown, trade with Alaska and the Hawaiian Islands. Alaska became a State of the United States in January, 1959, and the Hawaiian Islands in August, 1959.
(d) From 1st June, 1961, the Union of South Africa became the Republic of South Africa and withdrew from the British Commonwealth. It is included, for all years shown, in "*Foreign Countries*".

EXPLANATORY NOTES (*continued*)

Shipping Statistics

9. (a) The shipping statistics shown in Tables 1 to 17 of the *Shipping* section of this publication relate to *oversea and interstate* vessels engaged in the carriage of part or full cargoes for civil purposes. They exclude vessels trading solely between N.S.W. ports, war vessels, cable-laying vessels, and yachts. A vessel is counted as an entry once, and as a clearance once, for each voyage to and from New South Wales, being entered at the first port of call and cleared at the port from which it finally departs; any intrastate movements of the vessel are excluded.

(b) The shipping statistics shown in Tables 18 and 19 relate to *all vessels* (excluding warships) entering N.S.W. ports. They include oversea, interstate, and intrastate vessels, and vessels engaged exclusively in the transport of troops and defence equipment and supplies.
10. The gross tonnage of a vessel is the internal cubic capacity expressed as tons, with 100 cubic ft. equalling one ton. The net tonnage is the gross tonnage less spaces (e.g. engines and crew's quarters) which cannot be used for the carriage of cargo or passengers.
11. In recording *cargoes*, some commodities (e.g. coal, ores, wool, wheat, sugar, newsprint, and iron and steel) are assessed at their dead weight in tons, while others (e.g., butter, petroleum and motor spirit, textiles and apparel, and many manufactured goods) are recorded in tons measurement, 40 cubic feet being taken as the equivalent of one ton.
12. From 1st June, 1961, the Union of South Africa became the Republic of South Africa and withdrew from the British Commonwealth. For purposes of shipping statistics, it is included in "Commonwealth Countries" in 1960-61 and earlier years, and in "Foreign Countries" in 1961-62 and later years.

Road Accident Statistics

13. In New South Wales, road accidents resulting in personal injury or death or damage to property exceeding £25 (£10 for many years until May, 1960), must be reported to the police within twenty-four hours. Those accidents which involve casualties, breach of the law, or damage to vehicles are analysed by the Commissioner for Motor Transport. The road accident statistics in this publication are based on this analysis.

No. 3. Export Price Indexes, Australia

(a) Current Export Price Index

The current Export Price Index is compiled as a weighted average of the relative price movements of 29 commodities, the weights being based on the exports (valued at 1959-60 prices) of the commodities in the five years 1956-57 to 1960-61. In these years, the selected commodities accounted for about 83 per cent. of the total value of Australian exports.

† For sales to United Kingdom, guaranteed minimum prices are used when operative.

(b) Previous Export Price Index

This Index, which has been replaced by the current Index, was compiled as the weighted average of the prices of 20 commodities, the weights being based on the average annual exports (production in the case of gold) in the years 1933-34 to 1935-36. In recent years, these commodities have accounted for about 73 per cent. of Australian exports. The Index, as shown below, has been converted to the base: 1959-60 = 100. The "All Groups" Index in this and the current Export Price Index may be regarded as a comparable series.

* Particulars of goods carried in 1958-59 and earlier years are not comparable with those for 1959-60 and later years. Since 1959-60, the number of truckloads has been assessed on the basis that one bogie waggon was equivalent to two four-wheeled waggons, and not, as formerly, to only one. If assessed on the former basis, the number of truckloads of goods carried in 1959-60 would have been 1,050,085.

* The basis of the Post Office commercial accounts was altered in 1959-60. The principal changes were new methods of charging for super-annuation, depreciation, and interest. Interest became payable to the Treasury, at the long-term bond rate, on the net funds provided by the Treasury; in 1962-63, £19,911,000 of the total interest payable was in respect of the Telephone Branch.
